

Make your own Kaleidoscope or Teleidoscope

You can make either from this kit. If you wish to glue your final assembly choice, a drop of super glue along the tube & under the cap will hold them se-

Parts

PVC end cap with large hole
PVC end cap with small hole
Split PVC ring
3 acrylic lenses

Glass marble
beads
PVC Tube with mirror assembly

Purpose

object case
eye piece
separates 2 lenses and encloses objects
one to cover hole in eye piece, two to enclose objects in split ring
Object for teleidoscope
objects
body of scope and the mirrors make the "magic"

To assemble as a kaleidoscope: Place the frosted disk in the bottom of the cap with the large hole. Insert the spacer next. Fill with desired objects. Cover with a clear acrylic disk. Insert tube with mirror assembly. Place other clear acrylic disk in cap with small inch hole and place on the other end of the scope.

To assemble as a teleidoscope: Place marble in the cap with the large hole. Insert tube with mirror assembly. into the cap with the marble. Place a clear acrylic disk in cap with the small hole and cap the other end of the scope.

Enjoy!
